BONUT

LEGAL · PRIVACY

Privacy Policy

Effective **August 3, 2026** | Published by **Sharkship** | Contact **tech@sharkship.in**

Bonut ("**the App**", "**we**", "**us**") is operated by **Sharkship** ("**the Company**"). This policy explains what information we collect from users of the Bonut mobile app, how we use it, who we share it with, and the choices you have. By creating an account or using the App, you agree to the collection and use of information as described here.

01 Information we collect

Account information

- **Phone number** — used to create your account and log in via one-time password (OTP). No separate password is stored.
- **Name** — provided during onboarding and shown to other users you transact with.

Identity verification (KYC)

To let you post loads or accept jobs as a verified user, we ask you to complete identity verification:

- **Aadhaar number and OTP** — submitted to a government-linked Aadhaar verification service to confirm your identity. We do not store your Aadhaar number in plain text after verification completes.
- **Selfie / face photo** — captured using your device camera. On-device face detection (Google ML Kit) checks that a face is properly framed before capture; the resulting photo is uploaded to our servers for KYC approval and may be shown as your profile photo.

Vehicle & business information

- **Vehicle registration number** — verified against the government RTO/Vahan vehicle registry.
- **Truck type, capacity, length, and height** — used to match your truck to relevant loads.

Location

Precise or approximate device location is used to find your current position and to show nearby pickup/drop-off points and matching loads or trucks on a map. Location is only accessed while you're using the relevant feature.

Contacts

With your permission, we read your device's contact list to find other Bonut users among your existing contacts ("mutual connections"). Your contacts are matched against our user base and are not shared with third parties for advertising.

Photos & camera

Camera access is used for KYC selfie capture. Photo library access lets you choose an existing photo — for example for your profile — instead of taking a new one.

Financial information

- **UPI ID** — collected when you request a payout ("redeem") from your in-app wallet.
- **Wallet balance and transaction history** — including rewards earned and redemption requests.

Communications between users

When you connect with another user to discuss a load or job, the App facilitates a call between the phone numbers on file. Basic call metadata (e.g. duration) may be recorded for support and safety purposes.

Device & usage information

- **Device identifiers, model, OS version, and app version** — keep your account synced and help us debug issues.
- **Push notification token** — delivers notifications about loads, jobs, rewards, and account status via Firebase Cloud Messaging. Disable anytime in device settings.

02 How we use your information

- Create and secure your account, and verify your identity and vehicle so the marketplace stays trustworthy.
- Match you with relevant loads, trucks, or drivers based on location, truck type, and capacity.
- Process wallet rewards and redemption payouts.
- Send push notifications about activity relevant to you.
- Show you mutual connections from your contacts, with your permission.
- Investigate misuse, fraud, or safety issues, and respond to support requests.
- Improve the App's reliability and features.

We do not use your data for third-party advertising, and we do not sell your personal information.

03 How we share your information

- **Other users** — your name, profile photo, verification status, vehicle details, and phone number (for calls) are visible to users you interact with through search, matching, or job posting, as is standard for a two-sided logistics marketplace.
- **Government verification services** — your Aadhaar number and vehicle registration number are shared with the relevant government-linked verification APIs (Aadhaar eKYC, RTO/Vahan) solely to confirm your identity and vehicle.

- **Service providers** — infrastructure and processing partners (e.g. Google Firebase for push notifications and app infrastructure) who process data on our behalf under their own confidentiality and security obligations.
- **Payment rails** — UPI redemption requests are passed to payment processing partners to complete the transfer.
- **Legal requirements** — we may disclose information if required by law, regulation, or a valid legal request, or to protect the rights, safety, or property of Bonut, our users, or the public.

04 Data retention

We retain your information for as long as your account is active and as needed to comply with legal, tax, or regulatory obligations — for example, KYC and financial transaction records may be retained longer where required by Indian law. When you request account deletion, we delete or anonymize your personal information except where retention is legally required.

05 Data security

We use industry-standard measures — including encrypted storage for sensitive credentials on your device and encrypted transport (HTTPS) for data sent to our servers — to protect your information. No method of transmission or storage is 100% secure, and we cannot guarantee absolute security.

06 Your rights & choices

- **Access and correction** — view and update most of your profile information directly in the App.
- **Permissions** — grant or revoke camera, location, contacts, and notification permissions anytime in device settings. Revoking a permission may limit related features.
- **Account and data deletion** — email **tech@sharkship.in** with your registered phone number to request deletion of your account and associated personal data. We process requests within a reasonable time, subject to any legally required retention.

07 Children's privacy

Bonut is intended for commercial drivers, fleet owners, and shippers, and is not directed at children. We do not knowingly collect information from anyone under 18 years of age. If you believe a child has provided us with personal information, contact us and we will delete it.

08 Permissions used by the App

Permission	Purpose
CAMERA	Capture your KYC selfie

`ACCESS_FINE_LOCATION` `ACCESS_COARSE_LOCATION`	Find nearby loads/trucks, use current location in search
`READ_CONTACTS`	Find mutual connections among existing Bonut users
`Photo library`	Choose an existing photo instead of taking a new one
`POST_NOTIFICATIONS`	Deliver push notifications about your account, loads, and rewards

09 Changes to this policy

We may update this Privacy Policy from time to time. If we make material changes, we will notify you in the App or by other reasonable means. The effective date at the top of this page reflects the latest revision.

10 Contact us
